

Sinai Health and University Health Network Proudly Present:

2023 TORONTO GERIATRICS VIRTUAL UPDATE COURSE

INTERACTIVE ZOOM WEBINAR | FRIDAY, NOVEMBER 10TH

PROGRAM OVERVIEW

With the ageing of our population, there exists a growing demand for high quality accessible continuing medical education in Geriatrics.

We invite you to attend our eleventh annual Geriatrics CPD Course which has been designed to provide front-line practitioners with the latest practical and evidence-based knowledge they need to better manage the care of their older patients.

This year we will again be hosting a virtual one day program which will feature high-quality interactive lectures by leading faculty from the University of Toronto and beyond. The course will focus on the assessment and management of geriatric syndromes and common issues that arise in the care of an older patient, and also approach how to address common social issues related to geriatric care.

PROGRAM OBJECTIVES

After this educational conference, participants will be able to:

- Recognize and assess common geriatrics syndromes in older patients;
- Manage common single and multi-factorial medical issues in older patients;
- Establish an approach to address the common and often inter-related medical and social issues that occur within older patients.

PROGRAM HIGHLIGHTS

- Interactive Lectures
- Concurrent Breakouts
- Relevant Societal Issues Topics

TARGET AUDIENCE

Family Physicians, Nurse Practitioners, Nursing Professionals, Therapists, Social Workers, Geriatricians, Internists and other Professionals working with older patients.
